

Documentation

Documentation for BrainSpan

Document	Description
Developmental Transcriptome	Overview of methods for transcriptome profiling
Prenatal LMD Microarray	Overview of methods for prenatal laser microdissection microarray analysis
In Situ Hybridization	Overview of methods for ISH studies
Gene List	Complete list of ISH genes and corresponding anatomical structure(s) with ISH data available
Reference Atlases	Overview of methods for the reference atlases
Developing Human Brain Imaging	Overview of methods for structural and connectional imaging data
Ontology and Nomenclature	Rationale and sources for the ontology and anatomical nomenclature
Donor and Sample Metadata	Metadata for donors and samples
Acknowledgements	The many people and organizations that have contributed to this project
