

# Documentation

## Documentation for BrainSpan

| Document                                       | Description  |
|--|--|
| <a href="#">Developmental Transcriptome</a>    | Overview of methods for transcriptome profiling  |
| <a href="#">Prenatal LMD Microarray</a>        | Overview of methods for prenatal laser microdissection microarray analysis                   |
| <a href="#">In Situ Hybridization</a>          | Overview of methods for ISH studies  |
| <a href="#">Gene List</a>                      | Complete list of ISH genes and corresponding anatomical structure(s) with ISH data available |
| <a href="#">Reference Atlases</a>              | Overview of methods for the reference atlases  |
| <a href="#">Developing Human Brain Imaging</a> | Overview of methods for structural and connectional imaging data                             |
| <a href="#">Ontology and Nomenclature</a>      | Rationale and sources for the ontology and anatomical nomenclature                           |
| <a href="#">Donor and Sample Metadata</a>      | Metadata for donors and samples  |
| <a href="#">Acknowledgements</a>               | The many people and organizations that have contributed to this project                      |
