## Documentation: Allen Mouse Brain Connectivity Atlas

| Document   | Description  |
|--|--|
| <a href="#">Overview</a>                                     | Technical whitepaper describing the Projection Mapping studies   |
| <a href="#">Retinal Projectome</a>                           | Technical whitepaper describing the Retinal Projectome Mapping studies   |
| <a href="#">Informatics Data Processing</a>                  | Design and implementation of the Connectivity Informatics Data Pipeline (IDP)  |
| <a href="#">BDA vs. rAAV</a>                                 | Technical whitepaper describing the comparative studies between BDA and rAAV tracing methods   |
|  |  |
| <a href="#">Reference Dataset</a>                            | Technical whitepaper describing the generation of the reference datasets   |
| <a href="#">Mouse CCF, Reference Atlas, Version 3 (2017)</a> | Overview of the design and implementation of the Allen Mouse Common Coordinate Framework   |
| <a href="#">Transgenic Characterization</a>                  | Technical whitepaper describing the various characterization studies   |
| <a href="#">Resources</a>                                    | A complete list of driver and reporter mice and viruses used in the Allen Mouse Brain Connectivity Atlas projectome data, Transgenic Characterization, and Allen Cell Types Database |
| <a href="#">Acknowledgements</a>                             | Recognition of collaborators and others who provided assistance  |
